COMMITTEE'S REPORT.

School has been in session 33 weeks this year. There have been several changes in the teaching staff, some occasioned by offers of better positions. It is lamentable that we are unable to offer our teachers better inducements, at least as good as other towns of our size offer. Three of our best teachers are now receiving only \$7.50 a week. In spite of many limitations most of the schools have done good work and are now in proper condition to accomplish good results under right guidance.

The schools have been provided with good maps of the United States which will be of great help as every child should be well acquainted with his own country. New supplementary readers have been introduced for the grammar grades also a few geographies, arithmetics, and readers for the primary department. An excellent globe and a copy of Webster's New International Dictionary are now in use at the South Grammar school. The state course of study is being followed as far as possible however, it is impossible to do all the work required on account of our limited resources.

The schools are fairly well graded. This has taken time but the result is satisfactory.

Several teachers have successfully introduced the

"Aldine System" of reading. This is the system now in use in all up-to-date schools. Again our teachers are handicapped as the system, to be wholly successful, requires, books, charts, and cards, which we do not possess.

The town of Seabrook should be proud of its bright children and should endeavor to give them every advantage toward an education. The world has made rapid strides along this line. The education which was "good enough for our grandfathers" will not suffice for our children. They have different problems to solve and if we would have them hold their own we must see that they are well equipped. We would not send a soldier unarmed into the midst of battle, no more is it right to allow a child to face the world unprepared.

Most of our schools are in good condition, but they can be much better. Is the best any too good?

Let us hope that in the near future parents and public spirited citizens will combine to give our children all of the advantages of an up-to-date school. We should remember that the boys and girls of today will be the men and women of our town tomorrow.
